Achievements since joining the Orang Utan Coffee project:

- Agricultural capacity building: the smallholder farmers receive regular training on organic cultivation methods, including composting and re-planting
- Equipment improvements: mechanical weeding tools and de-pulping units, upgrades to the post-harvest facilities for the drying process
- Improved livelihoods: enhanced processes and trainings achieve for a superior product, helping establish long-term financial stability for smallholder farmers and their families.

Future investments needed:

Post-harvest equipment for sorting and sizing unit (Sutton Machine)
